

**Eshib --Purchase Process with BNB**

## How to buy Eshib with BNB?

1. We must go to "poocoin.app"

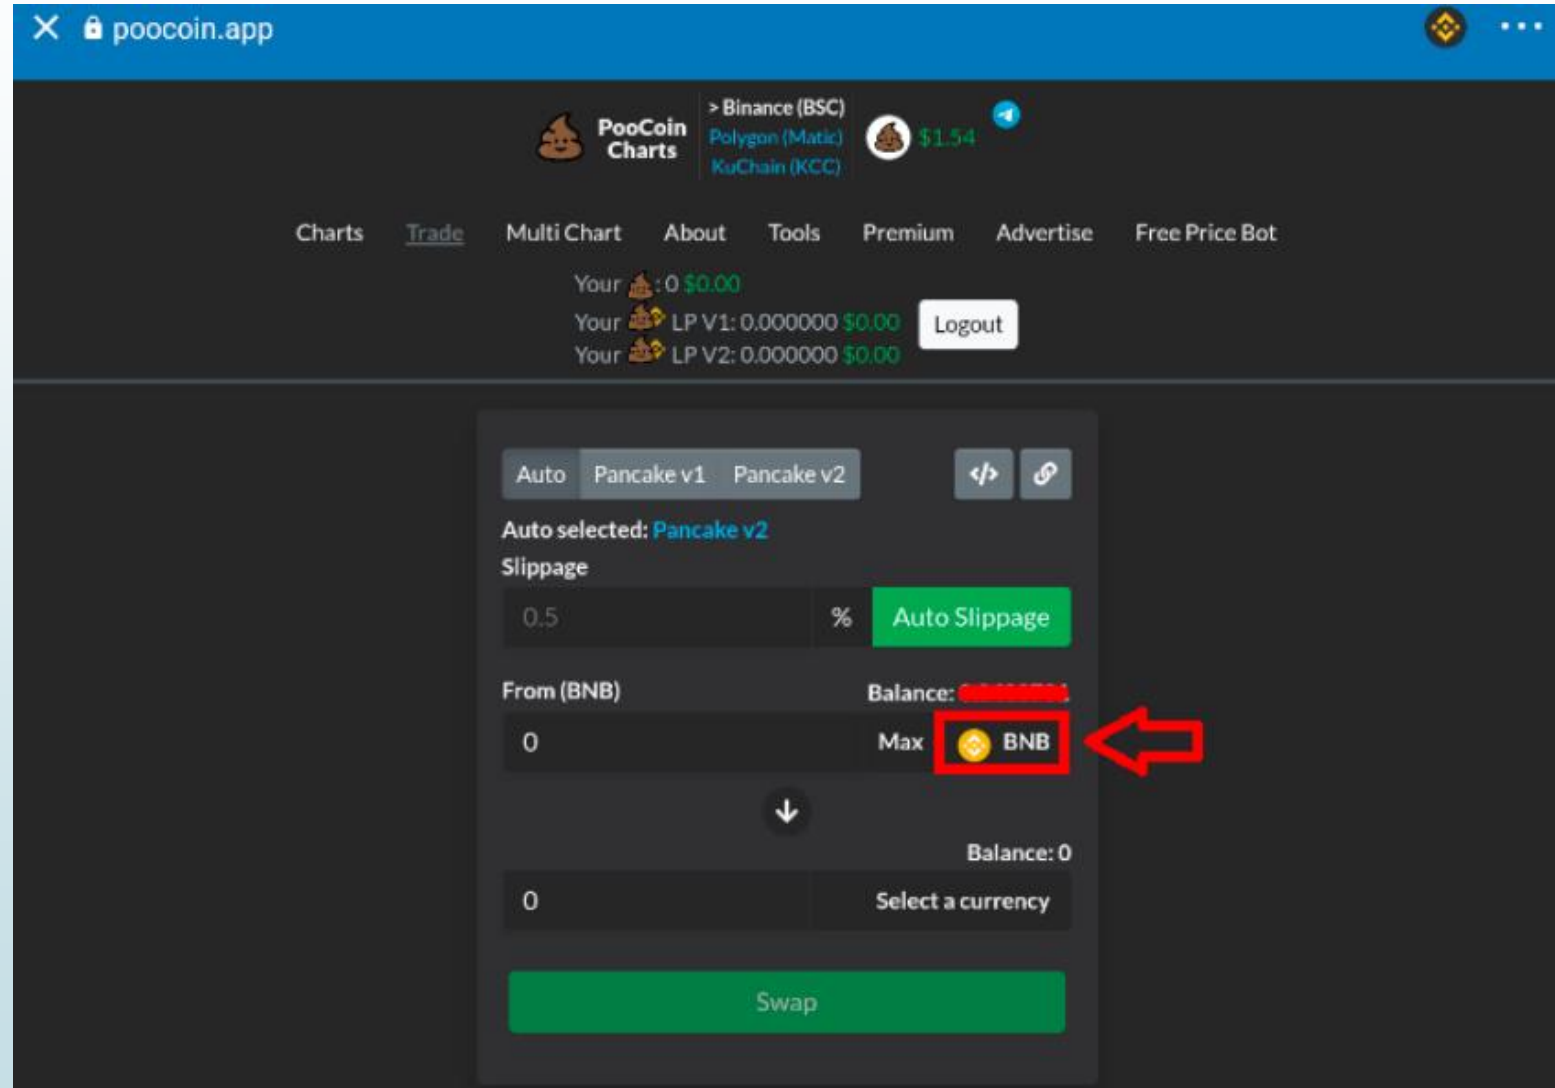

2. Once inside, click on the “Trade” section.

The screenshot shows the PooCoin Charts website interface. The browser address bar displays "poo coin . app". The main navigation menu includes "Charts", "Trade", "Multi Chart", "About", "Tools", "Premium", "Advertise", and "Free Price Bot". The "Trade" option is highlighted with a red box, and a red arrow points to it from above. The user's account information is displayed, including "Your PooCoin: 0 \$0.00", "Your LP V1: 0.000000 \$0.00", and "Your LP V2: 0.000000 \$0.00", along with a "Logout" button. The trading interface below shows "Auto" selected, "Pancake v2" as the auto-selected option, a slippage of 0.5%, and a "Swap" button at the bottom.

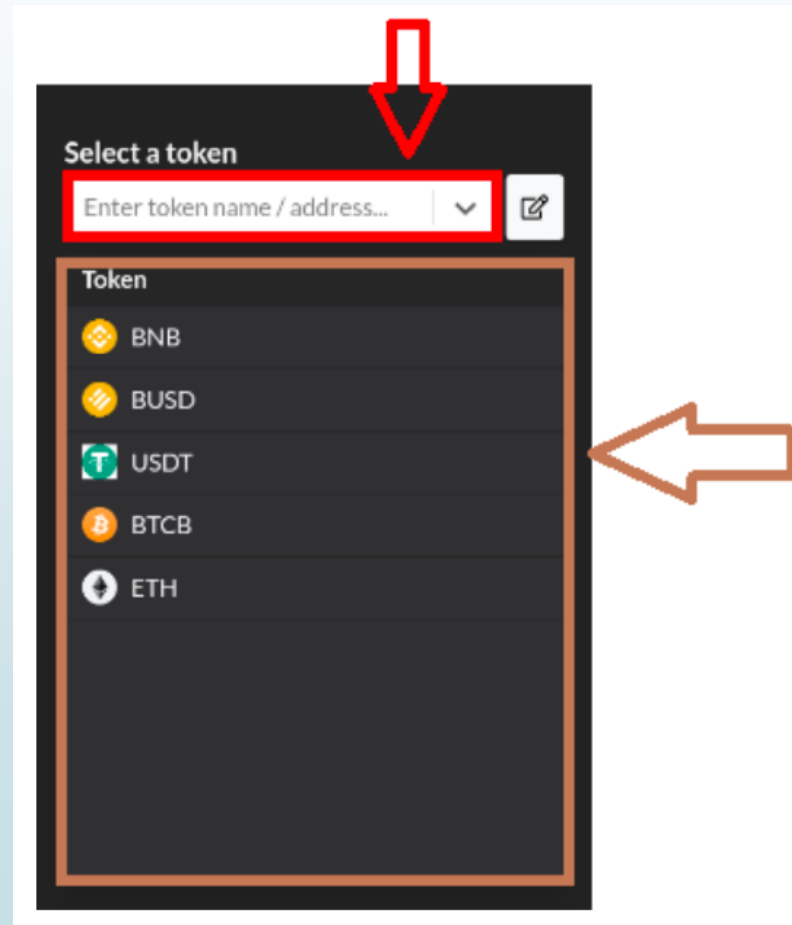

3. We must select BNB to make the transaction to **EShib**, for this we must click just above the rectangle marked with a red arrow. In the event that BNB is already selected, skip to step 6.

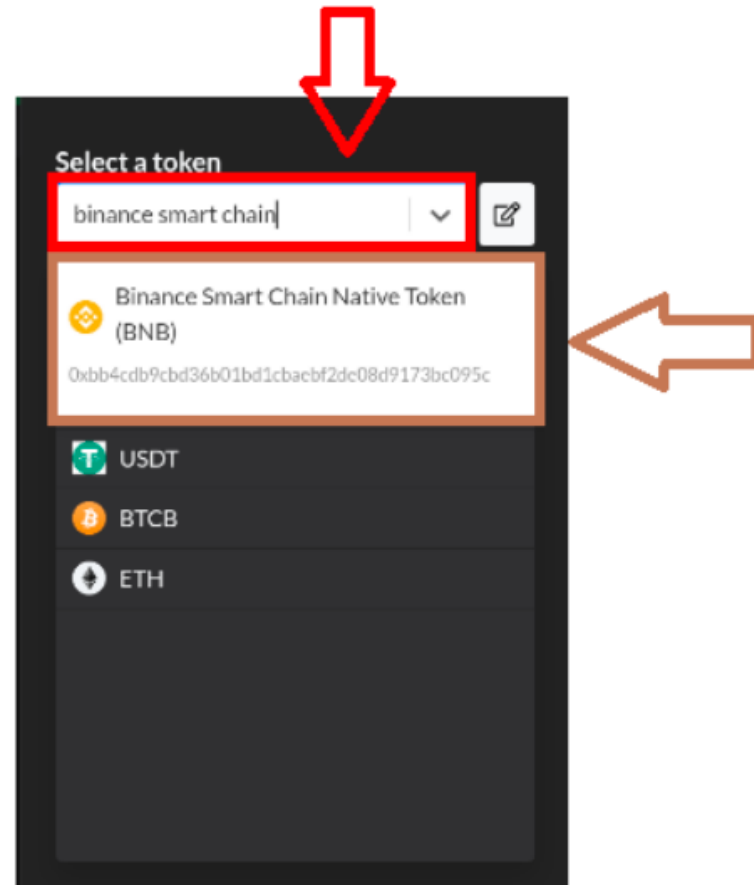

The screenshot shows the PooCoin Charts trading interface. At the top, there's a navigation bar with 'Charts', 'Trade', 'Multi Chart', 'About', 'Tools', 'Premium', 'Advertise', and 'Free Price Bot'. Below this, user balances are displayed: 'Your 🐶: 0 \$0.00', 'Your 🐶 LP V1: 0.000000 \$0.00', and 'Your 🐶 LP V2: 0.000000 \$0.00'. A 'Logout' button is visible. The main trading area shows 'Auto', 'Pancake v1', and 'Pancake v2' tabs, with 'Auto selected: Pancake v2'. The 'Slippage' is set to 0.5% with an 'Auto Slippage' button. The 'From (BNB)' field is set to 0, and the 'Balance:' is redacted. The 'Max' button is highlighted with a red box, and a red arrow points to it. Below this, there's a dropdown menu with '0' and 'Select a currency'. A 'Swap' button is at the bottom.

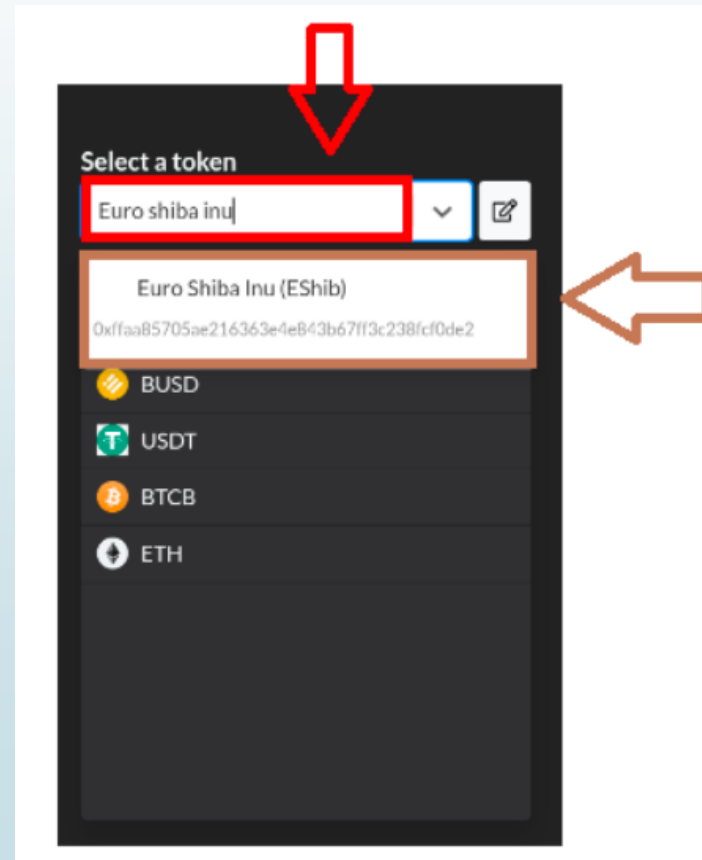

4. Now a new window will appear where we must choose the token we want to exchange. In brown we see the tokens by that appear, and in red a field where we can enter the token that we want to search for, which will be necessary to use in the case that the token that we want appears in the area with the rectangle Brown. In this case we could click directly on BNB and would select.

5. If the token that we want to exchange does not appear, we click on the field “Enter token name / adress...” and enter “binance SmartChain”, a dropdown will open with the search result, we must click on “Binance Smart Chain Native Token (BNB)”.

6. We have already completed the first part for the exchange. Now we must perform the second, for this we must click on “Select currency”. Another window will open and in the field “Enter token name /address...” we enter “**Euro Shiba Inu**”. Take care in this part and write exactly as described so as not to make a mistake with the token. One time found the **EShib** token we must select it by clicking on it, right in the place indicated by the brown arrow.

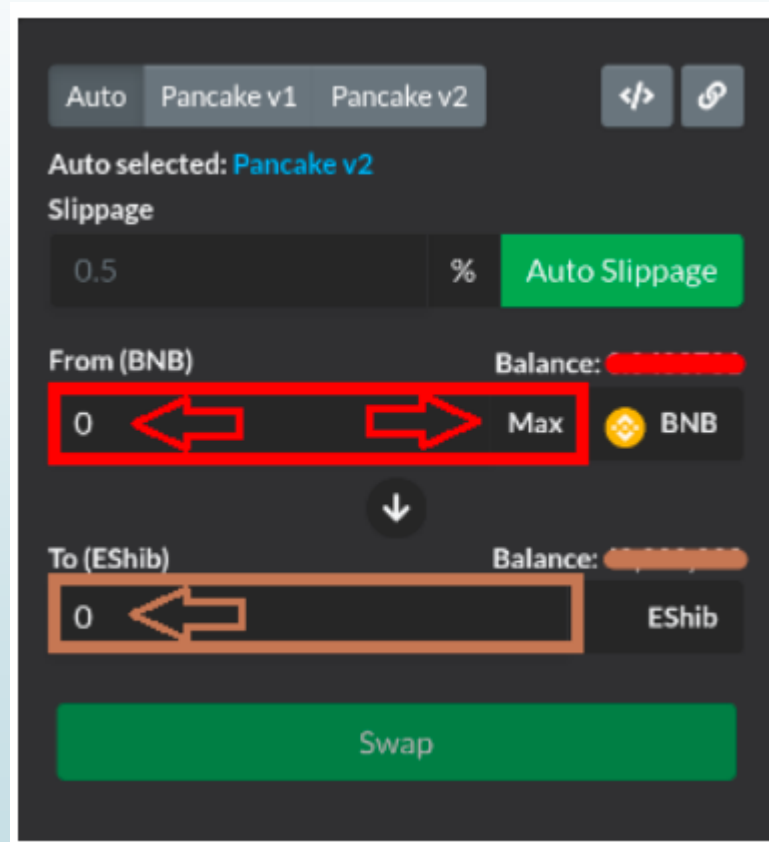

7. Now we have the two tokens with which we are going to carry out the transaction.

The screenshot shows a swap interface on PancakeSwap v2. At the top, there are tabs for 'Auto', 'Pancake v1', and 'Pancake v2', with 'Pancake v2' selected. Below the tabs, it says 'Auto selected: Pancake v2'. There are two icons on the right: a code editor icon and a link icon. Underneath, the 'Slippage' is set to 0.5% with an 'Auto Slippage' button. The 'From' field is labeled 'From (BNB)' and has a value of 0. To its right is a 'Balance:' indicator with a red progress bar. Below the 'From' field is a 'Max' button and a dropdown menu showing the BNB token icon and 'BNB'. A downward arrow is centered between the 'From' and 'To' sections. The 'To' field is labeled 'To (EShib)' and has a value of 0. To its right is a 'Balance:' indicator with an orange progress bar. Below the 'To' field is a dropdown menu showing the EShib token icon and 'EShib'. At the bottom of the interface is a large green 'Swap' button.

8. Now we must put the figure that we want to transfer from **BNB to Eshib**, we can even transfer everything at once by clicking on "Max". At rectangle with the red arrow to the left is where we put the desired amount to transfer and the red arrow to the right is where we must press to put all the amount of BNB that we have to cross over At the bottom marked with the brown arrow will reflect the **EShib** that will correspond to the amount of BNB that we will transfer

9. To finish we must click on Swap and the transfer will be carried out.
